

Generative AI MasterClass: Increase Productivity & Output

February 25, 2025

08.00-10.00

THB 3,000

Generative AI, when used effectively, increases productivity and output to create stronger teams who are equipped with technical leadership skills to collaborate across industries.

This AIHM MasterClass is led by Chris Meylan, COO of the Asian Institute of Hospitality & Management. As a graduate of EHL and TEDx speaker, Chris brings technology solutions to empower executives to make changes that can transform how their leaders operate everyday. The skills acquired during this session can be implemented as solutions that can be applicable to any business concepts. Gain clarity on how to use these tools and leave with a plan to empower your team using Generative AI.

Learning Outcomes

- **Increase Productivity:** Utilize free and paid AI tools to achieve more with greater clarity.
- **Design Effective Prompts:** Implement proven solutions to increase your and your team's output.
- **Recommend Solutions:** Select AI tools that are right for your team, encouraging efficiency and achieve stronger, measurable results.
